

Worldwide participants from Applied Biochemistry and Biotechnology area

Best Oral/Poster Presenters Awarding

Opportunities to publish in indexed journals

ABB 2020

About 150 participants from more than 25 countries joined ABB 2019, and we cordially invite you join ABB 2020 to be held from August 23rd-26th, 2020 in Tokyo University of Agriculture, Japan.

About ABB

International Conference on Applied Biochemistry and Biotechnology is convened annually to gather related experts, researchers, and academics to exchange innovative ideas and experiences in the field of applied biochemistry and biotechnology.

Early Standard Registration	
Regular Participants	USD 600 (JPY 65,000)
Authors/Co-authors	USD 500 (JPY 55,000)
Late Standard Registration	
Regular Participants	USD 650 (JPY 70,000)
Authors/Co-authors	USD 550 (JPY 60,000)

Technical Program

The scientific program includes keynote speech, invited speech, oral and poster presentations.

August 23rd	Registration
August 24th	Opening Ceremony, Plenary & Oral Speech
August 25th	Invited & Oral Speech
August 26th	Poster Presentation

ABB 2020

The 3rd International Conference
on Applied Biochemistry and Bio
technology

ABB 2020

3rd International Conference on
Applied Biochemistry and Biotechnology
August 23rd-26th Tokyo, Japan

◆ Explore Tokyo ◆

Tōkyō is the capital of Japan. With over 13 million people within the city limits alone, Tokyo is the core of the most populated urban area in the world. This huge, wealthy and fascinating metropolis has something for everyone: be it high-tech visions of the future, or nostalgic glimpses of old Japan.

Tokyo is modern and cosmopolitan, yet rich in cultural heritage. Majestic skyscrapers contrast with the venerable Tokyo Station building and nearby Imperial Palace with its moat and inner gardens. A short walk from fashionable Ginza is the historic theater where kabuki is performed.

◆ Tokyo University of Agriculture ◆

Tokyo University of Agriculture is a private agriculture university. It was the first such institution founded in Japan. As of 2006 it is the only private university in Japan that specializes in agriculture.

Including public agriculture universities, Tokyo University of Agriculture is ranked third, behind Sapporo Agricultural College and the University of Tokyo, Komaba Campus.

Important Dates

Submission Deadline: February 25th

Early Registration Deadline: July 1st

Main Topics

Biochemistry and Biotechnology Application in Agricultural, Medical and Industrial Area including Cell Biology, Protein Sciences, Genetic Engineering etc.

Online Submission Now

Presentation

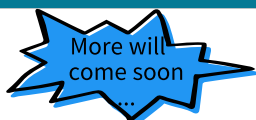

The vision of our congress is to engage the participants in meaningful session for the exploration on scientific advancements. Here below is the time duration for each kind of presentation.

Presentation Type	Total Allotted Time
Keynote Presentation	40 mins
Invited Presentation	20 mins
Regular Oral Presentation	15 mins
Poster Presentation	2 Hours

TPC Members

Prof. Ani Idris, Universiti Teknologi, Malaysia
Prof. Young Shik Park, Inje University, Korea
Prof. Richard Daniellou, University of Orléans, France
Prof. Mohamed Chiban, Ibn Zohr University, Morocco
Prof. Siva Ramamoorthy, Vellore Institute of Technology, India
Prof. Majekodunmi O. Fatope, Sultan Qaboos University, Oman
Prof. Toshifumi Tsukahara, Japan Advanced Institute of Science and Technology, Japan
More could be found on the website...

Speakers

Prof. Hua-Wen Fu
National Tsing Hua University, Taiwan

Prof. Appa Podile
University of Hyderabad, India

Prof. Te-Sheng Chang
National University of Tainan, Taiwan

Prof. Yuanda Song
Shandong University of Technology, China
